

AirPure 100mg/h 230v Plug and USB Powered Ozone Generator – Use For Air Sanitation

The use cases are astounding.

Need it to be portable then just connect your own power bank and you can use it anywhere, like in clothes or kitchen cupboard, car, bedroom.

Take on holiday to ensure you keep your hotel room safe and kill any residual germs or bacteria from previous guests.

More than just O3 generator, has built in anion generator to ionise air. Ioniser emits negative charges attracting positive charged particles like pollen and dust, causing them to fall to the ground.
