

## OzoPure

### Ozogen Water & Air Unit

By applying an electrical discharge in a confined space a corona is produced. Air is pumped through this confined space by a built in pump and the oxygen (O<sub>2</sub>) converted to ozone (O<sub>3</sub>).

Ozone is the allotrope of oxygen, one of the world's strongest oxidants.

Ozone can be used to attain rapid sterilization, disinfection, preservation and deodorization.

After disinfection, ozone returns to oxygen with no residues, which makes it one of the most environmentally friendly disinfectants known to man.

By using a microcomputer time control system, the device's working time is able to be set to suit different working environments.

It is the optimal choice for looking after your household's health.

### Specifications

Input voltage: 220VAC / 50-60Hz
Rated power: ≤15W
Ozone output: Max 500 mg/hr
Airflow Rate: 1.5-2 LPM
Timer: Digital On/Off—On/Off Sequence Set
Product Weight: 1250g

### Some uses:

- 1) Rapidly oxidize the harmful suspended particles in the air, get rid of smoke and bad smells whilst killing bacteria.
- 2) Rapidly kill any bacteria or virus's in water, destroy toxic elements and increase the oxygen concentration of the water.
- 3) Get rid of pesticide residues on vegetables or fruit.
- 4) Kill molds and harmful bacteria, prolonging the shelf life of foodstuffs.
- 5) Sterilize and deodorize clothes, textiles and other items like children's toys etc.
- 6) Get rid of bacteria and dirt on the surface of your skin to improve the breathing of your skin and maintain skin activity.

Ozone is a natural gas that we breathe daily. It is created when oxygen (O<sub>2</sub>) molecules are split into two separate atoms by ultra violet radiation from the sun, lightning, and electric arc. The freed atoms recombine in 3-atom groups to form cousins of oxygen: ozone (O<sub>3</sub>). The word ozone comes from the Greek word ozein meaning smell, because of its distinctive sun-ray lamp smell. Ozone is nature's way of cleaning pollution from our atmosphere.

### Standard Available Unit

OzoPure	220v
